The Exploit Database and Google Hacking Database

4 sources

The provided text describes **Exploit Database**, a non-profit project managed by **OffSec**, an information security training company. This database serves as a **CVE-compliant archive of public exploits and vulnerable software**, crucial for penetration testers and vulnerability researchers seeking actionable data. Additionally, the text introduces the **Google Hacking Database (GHDB)**, a component of the Exploit Database that catalogs search engine queries designed to uncover sensitive information unintentionally made public, often due to user misconfigurations. **OffSec** maintains various other **resources** including papers, shellcodes, and training solutions, all contributing to the field of cybersecurity.
